

From evaporating costs ... to measurable profits with **FleetFix**

FleetFix is a strategic platform that redefines fleet maintenance as a profit driver, delivering precise insights that reduce costs, optimize utilization, and enhance overall value.

Challenges

High Pending Time

Long workshop downtime cuts available cars and pressures branches.

Untracked Repair Costs

Maintenance = ~25% of costs, can reach 30% or fall to 20% based on management.

Inefficient Workforce Allocation

Poor task distribution wastes technician time and raises unproductive hours.

Inventory Chaos

Hard to set spare part minimums & Dead stock and sudden demand changes cause delays.

Lack of Real-Time Visibility

No clear view of pending/ready cars, branch reports, or total costs.

Key Features

Real-Time Insights

Centralize site/team data with live dashboards for a unified view.

AI Repair Planning

Automate repairs using AI, vehicle history, and technician availability.

Task Analytics

Spot idle time, missed tasks, and bottlenecks with AI analytics.

Vehicle History

Instantly access full repair, inspection, and usage logs.

Inventory Control

Track parts via barcodes and alerts to cut dead stock and delays.

Mobile & QC Tools

Enable photo-based QC, approvals, and updates via mobile.

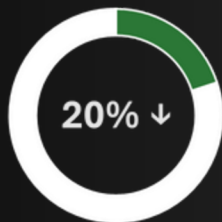

Multi-Site Control

Manage workshops centrally with standardized processes and KPIs.
