ATUM
By AtenTEC

ATUM IS NOT JUST ANOTHER ERP

ATUM is not just an **ERP** alternative — it's the blueprint to build your own, customized to your domain.

ATUM Is Not Just Another ERP

Unlike traditional ERPs that force your business to adapt to their logic, **ATUM** gives you the control to define your logic — with faster deployment, smarter extensions, and full ownership of data and evolution.

TRADITIONAL ERP

DEPLOYMENT FIT
Generic templates

EVOLUTION SPEED
Slow, costly to adapt

CUSTOMIZATION
Expensive, risky, and vendor-tied

INTEGRATION APPROACH
Limited APIs, tough ETL

TIME TO DEPLOY
6–18 months for implementation

TOTAL COST OF OWNERSHIP
High — especially for changes

PROBLEM
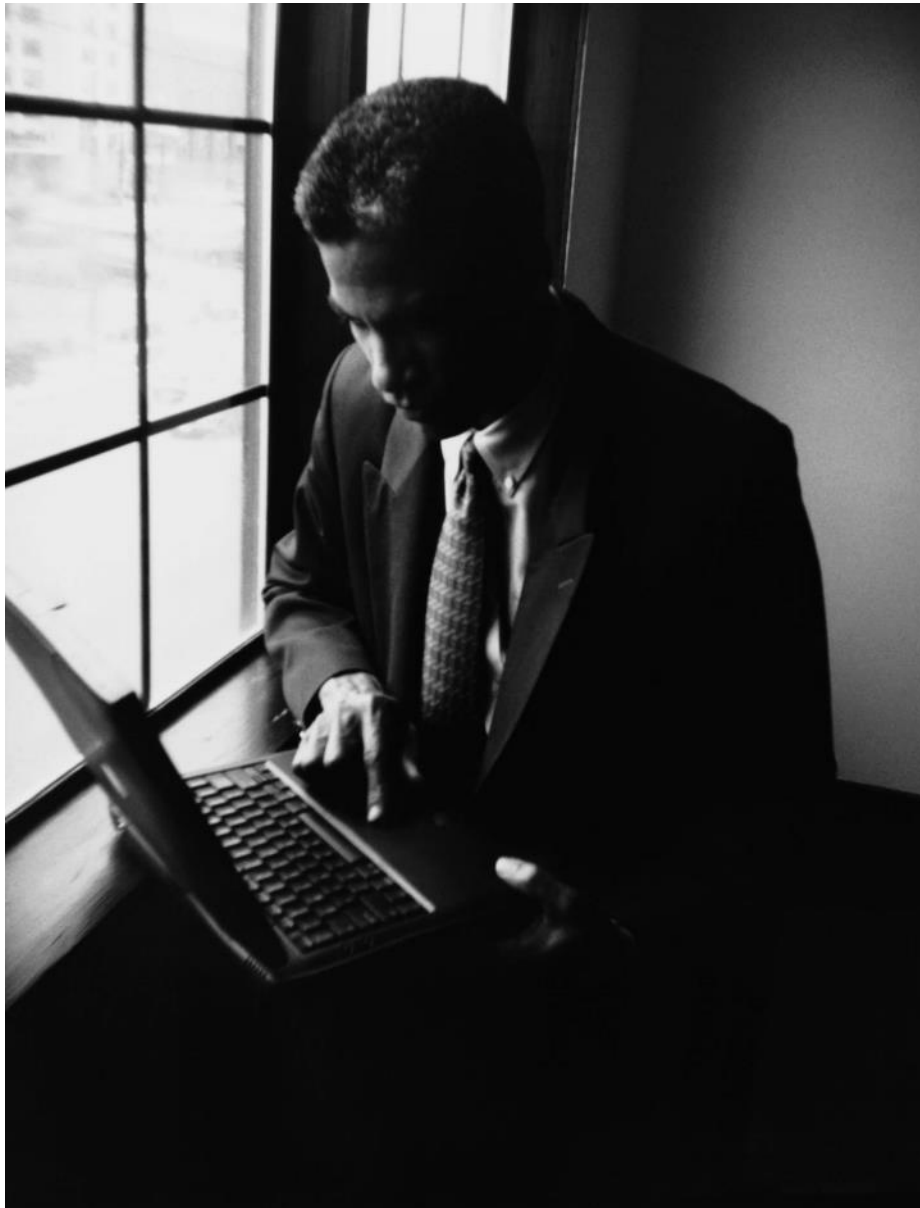

ATUM
By AtenTEC

SOLUTION

PURPOSE-BUILT, BUSINESS-FIRST

Every **ATUM**-powered solution is designed around your real business operations — not forced into generic software molds.

RAPID, MODULAR, AND OWNER-CONTROLLED

You stay in control: build what you need, fast — using modular tools that grow with your business.

1–6 MONTHS (USING PREBUILT CORES + LOW-CODE WORKFLOWS)

Launch faster with prebuilt logic blocks and low-code workflows — most platforms go live in under 6 months.

SOLUTION

FAST ITERATION VIA CONFIG, SCRIPTS, OR EXTENSIONS

Need to evolve? Just configure, script, or extend — no delays, no codebase rewrites.

API-FIRST, MQ-NATIVE, FULL-SERVICE BUS READY

ATUM speaks the language of modern systems — seamless integration via APIs, message queues, and service buses.

LOWER TCO; COST DROPS AFTER FIRST PROJECT

Your first project sets the foundation — future rollouts become faster, cheaper, and more scalable.

WHY ATUM WINS

ADAPTABILITY

Built for **operational complexity**, not rigid templates

PROVEN

Proven in **FleetFix**, **Anchor MMS**, and **vertical SaaS platforms**

RESILIENCE

Designed to handle edge cases, legacy processes, and on-the-ground reality

PRODUCT BENEFITS

↓ **40%**
FleetFix reduced repair time by 40% — thanks to dynamic process configs.

↓ **95%**
Anchor MMS 95% reduced invoices errors.

3 Editions
Anchor BMS supports 3 operational roles with tailored workflows in under 2 weeks.

These are not generic deployments. Each case was delivered with ATUM's configurable micro-kernel — zero compromises, faster time-to-value.

WHY GOVERNMENTS & ENTERPRISES TRUST ATUM

[AtenTEC] Custom-Built Platforms for Complex Operations and Specialized Workflows. **Powered by ATUM.**

BUSINESS MODEL

SOVEREIGNTY

100% Data Sovereignty — your infrastructure, your rules

COMPLIANCE

Modular Compliance — configure region-specific tax or security rules

PRECISION

Local Logic, Global Standards — workflows tailored to exact needs

SCALABILITY

Future-Ready — no vendor lock-in, easily upgradeable per product line

MARKET OVERVIEW

+12,00.50

CTOs and IT Managers tired of ERP workarounds

Business Units that reject off-the-shelf constraints

Government and private platforms that demand both control and compliance

[AtenTEC] Custom-Built Platforms for Complex Operations and Specialized Workflows. **Powered by ATUM.**
